Known Issues Being Worked On

1. On AtGames Legends Pinball HD, Legends Pinball Micro HD, and Legends Core Max HD devices, launching a Renovation game and remaining idle for 15 minutes or more may cause a freeze or crash. Rebooting the device recovers this issue until launching a Renovation game again and remaining idle for 15 minutes or more.
2. Some audio distortion can be heard on AtGames Legends Pinball HD, Legends Pinball Micro HD, and Legends Core Max HD devices in the Renovation HD Game Packs.
3. Super Valis IV and Doomsday Warrior when played on a Legends Core HD incorrectly lists the "RB" and "R1" button as "LB".
4. Leaderboards are currently being investigated if any Renovation HD Game Pack games can support them in a future update to the game packs.
5. BitLCD images are currently unable to be updated due to a server issue but will be included as soon as possible with a BitLCD firmware update.
