## Known Issues Being Worked On:

1. Improvements for flipper lag in Zen pinball tables are still in progress.
2. Accelerometer can not be adjusted or disabled.
3. The plunger sensitivity has a small dead zone and minimal lag affecting visual feedback. A fix is being worked on for future builds.
4. On rare occasions, CE-4K may crash to a black screen with a "Critical Error" pop-up. If this happens, you should restart your Legends Pinball 4KP machine.
5. Wireless Pairing does not scan automatically on some rare occasions. In this case, the Bluetooth devices will not be listed. Restart your Legends Pinball 4KP machine to fix this problem.
6. After playing a game from an FDX thumb drive, the FDX thumb drive can no longer be dismounted.
7. On rare occasions when you try to connect to a Wi-Fi network, CE-4K may crash.
8. Bluetooth headsets are currently not fully supported. While they will pair in the Wireless Pairing screen, audio will not be sent to them.
9. Arcade Play Link does not support portrait mode.
10. Pinball packs that have the same table(s) already pre-installed in the machine will not be displayed as duplicates when they are downloaded. CE-4K will only show the pre-installed same tables. This will be adjusted in a future release.
11. Switching the Flipper and Nudge buttons inside of the Pinball Settings does not function within Zen tables.
