Notes:

Each table on PinballNet™, on AppStoreX™, and those that are built-in are treated as unique tables, which makes it possible to download pinball tables more than once to your machine.

**Legends 4K™ PinballNet™ is available only on Legends 4K™ devices on the latest CE-4K firmware v6.0.16 or higher.*

Known Issues Being Worked On:

1. Filters are currently unavailable for PinballNet™ and will be included in a future update.
2. Favoriting a pinball table in PinballNet™ adds the table to the existing Favorites section. If a table is downloaded both from AppStoreX™ and PinballNet™, and that table is marked as a Favorite in both All Tables & Games and PinballNet™, it will appear twice in Favorites.
3. Gottlieb and Zaccaria Deluxe pinball tables currently download a full pinball pack of data with each table which may result in a slightly increased download time compared to other tables.
4. The QR code on the notification message for PinballNet™ from the device may link to an incorrect page that no longer exists. For more information on PinballNet™ and the corrected link please find it here.
