Known Issues Being Worked On:

1. Under certain conditions, slight ball stuttering may be observed.
2. In Godzilla vs Kong, at the start of a mode, "Skip to Launch" only works with the Start button and not the plunger. This will be corrected in a future update.
3. When playing in offline mode, scores in the Local Leaderboard may be duplicated.
4. Switching the Flipper and Nudge buttons inside of the Pinball Settings does not function properly within Zen pinball tables.
5. Due to the size of the Godzilla vs. Kong Pinball tables, users will see a short pause when launching them. It occurs just before their playfields appear.
6. When the Haptic Feedback is set to "Disable", Haptic Feedback and Solenoids will not be available in Godzilla vs. Kong Pinball tables. Changing this setting to "Enable" will allow the use these features. This will be corrected in an upcoming firmware release.
7. As stated in Known Issue #1 in the Firmware v6.0.28 Release Notes, found [here](#), after playing a not-yet-updated Zen table, updated Zen tables will experience micro-stuttering. Restarting the machine will resolve this issue.
