Known Issues Being Worked On:

1. Switching the Flipper and Nudge buttons inside of the Pinball Settings does not function properly within Zen pinball tables.
2. When the Haptic Feedback is set to "Disable", Haptic Feedback and Solenoids will not be available in Star Trek™ Pinball. Changing this setting to "Enable" will allow the use these features. This will be corrected in an upcoming release.
3. Due to the size of the Deep Space Nine and The Kelvin Timeline tables, users will see a short pause when launching them. It occurs just before their playfields appear.
4. As stated in Known Issue #1 in the Firmware v6.0.28 Release Notes, found [here](#), after playing a not-yet-updated Zen table, updated Zen tables will experience micro-stuttering. Restarting the machine will resolve this issue.
