### Known Issues Being Worked On

1. Switching the Flipper and Nudge buttons inside of the Pinball Settings does not function properly within Zen pinball tables.
2. When the Haptic Feedback is set to "Disable", Haptic Feedback and Solenoids will not be available in the 3 tables included in Universal Classics Pinball™. Changing this setting to "Enable" will allow the use these features. This will be corrected in an upcoming release.
3. In some situations, players may experience minor ball stuttering during gameplay.
