Known Issues Being Worked On

1. Switching the Flipper and Nudge buttons inside of the Pinball Settings does not function properly within Zen pinball tables.
2. On Xena, shooting the outer left shot can cause the ball to get stuck behind the Pink Fire Wall.
3. The DMD preview image for Battlestar Galactica is very blurry.
4. At the end of the game for Knight Rider, the DMD shows "Game Over" text on top of the "Goliath Mission" text.
5. When nudging all 3 tables, the SSF audio feedback is not as noticeable as other Zen tables.
6. During Knight Rider's Goliath Returns mission, the ball gets lost in the sink-hole.
7. Battlestar Galactica DMD mission select screen does not have plunger support. It currently only accepts pressing the Start Button or pressing down on the D-pad or Joystick to select a mission.
